

AXLE MAX

Wabtec freight car components

With the introduction of new and innovative electronic devices for freight car applications, the need for reliable, point-of-use power continues to increase. Wabtec's AxleMax provides an independent source of electric power for freight cars where no other power sources are available.

FEATURES

- Meets AAR loading gauge
- Maintenance-free during service
- Speed dependent output: 100 W possible for each unit
- Retrofittable without modification to bearing or bearing end cap (various AAR bearing sizes such as E, F, G & K)
- Ability to fit multiple units per wagon, depending on power usage

APPLICATIONS

- Wagon location
- Anti-theft systems
- Monitoring system for special-goods transport
- Freight car monitoring and communications
- Handbrake set/release
- Brake system monitoring
- Customized solutions
