Extruded Chock

AIRCRAFT CHOCKS

For use with medium-duty trucks, aircraft, and large pipe.

Weight: 9 lbs./ft. (black)
7 ½ lbs./ft. (yellow)

Heavy-Duty Truck & Trailer Chocks

Longwood's heavy-duty molded wheel chocks are a "must have" for safety, durability, and economy.

OSHA requires wheel chocks under the rear wheels of highway semi's while being loaded or unloaded with powered lift trucks. The design and composition of our chocks minimizes the possibility of injury from unsecured trailers and positively prevents vehicle movement. Our chocks are designed to grip even under bad weather conditions.

Economy and Durability

Once you buy Longwood wheel chocks, you can't get rid of them. They're yours for a long, long time. Our chocks are made of Tensile-Tex, 100% fiber-reinforced rubber, so they'll probably outlast your

trucks. They can't get lost, because the eyebolt ensures that they'll stay put right on the dock or on the truck. If they get run over, they bounce right back, and they can't ruin your truck's tires because of their hard rubber composition.

These chocks resist abrasion, sun, oil, and ozone. They can withstand extremes of cold, heat, and weather, too. They're almost forever. Give them a try and you'll see what we mean.

Heavy-Duty Truck & Trailer Chocks

| Part # | Size | Wt. Each |
|---------|-------------------------------------|------------|
| 18-1047 | 5 5/8"H x 9 1/2"W x 7 3/4"L—Pyramid | 7 - 8 lbs. |
