

Wabtec's Digital Solutions

# ExpressYard<sup>®</sup>

## Car Repair Billing

### Core Capabilities

- Cloud-based back office system for railcar repair shops
- Captures repair data & calculates billing
- iOS and Android compatible mobile application to capture repair data in the field
- Manages inventory & part control process
- Provides regulatory compliance
- Produces repair invoices

### Differentiating Features

- Advanced railcar repair bill auditing
- Scans inventory barcodes & associates them with repair data
- Highly configurable to meet AAR and/or contract repair operation needs
- Integrates with Railinc, Umler<sup>®</sup>, EHMS, Early Warning, and CEPM data feeds

### Optimized Outcomes

- Increases productivity
- Reduces costs
- Increases management visibility and problem identification

### Boost productivity and fast-track your operations with streamlined railcar repair.

The relentless pressure of high productivity, industry regulatory compliance and increasing customer expectations means there's little room for error and inefficiency when it comes to running a railcar repair operation.

ExpressYard Car Repair Billing is a software solution designed to help railcar repair organizations simplify and manage billing and maintenance operations, and ensure regulatory compliance. With the benefit of timely data, enhanced management information and powerful decision-making tools, you can streamline and integrate your operations from better managing freight car repair billing, parts inventory and employee labor hours to early warnings and maintenance advisories for railcars.

**The result?** Enhanced operational efficiency through a single, integrated solution designed to manage all aspects of operating a railcar repair shop. Increased bottom-line productivity. And reduced repair and maintenance costs system-wide.
